The Hungarian higher education according to foreign students studying in Hungary

The three most frequently mentioned reasons for studying in a Hungarian higher education institution are high quality education, the desire to get to know another culture and affordable prices.

Foreign students gave a value of four (on a 5-point scale measuring their satisfaction) to shopping, sport, entertainment, transportation, and accommodation facilities.

70 percent of the respondents would choose Hungary again to study if they had to choose again.

26 percent believe that maybe they would come to study to Hungary again.

- Collaboration tools
- Wireless applications
- Simulation equipment
- Classroom sound system
- Camera / webcam
- Ebook reader
- Interactive table
- Smartphones
- Touch screen tablets
- Interactive systems (Kinect system)
- 3-dimensional applications and systems
- iPads, tablets

Digital skills for everyone - from the basics to the ECDL

The training is similar to the ECDL training in terms of its modules, but you do not have to take module exams here! At the end of the training, the participant obtains a certificate of the completed training.

The training program hours: 250 hours (theory: 48 hours, practice: 202 hours)

Training modules:

- ICT basics
- Operating Systems (=> Computer Basics)
- Text Editing
- Internet and communication (=> Online basics)
- Spreadsheet
- Database Management
- Presentation
- Image Editing
- Web Beginner (Web Editing)
- Electronic authentication, electronic signature

The aim of the program: to acquire the basic digital competencies of ICT 0-1 level. The training program aims to meet the most basic requirements of the information society, ie to use the computer and the Internet at a basic level, thus improving the quality of life of the participants in the program and improving their labor market opportunities.
