

## AIMS OF THE PROJECT

Digital@adults.eu is an international Erasmus + strategic partnership project of cooperation for innovation and the exchange of good practices. The project aims to disseminate good practices at European level through the training of trainers, who can provide digital skills, particularly in the use of social networks applied to the world of work to disadvantaged adults.

It involves 7 organizations from Italy, Germany, Spain, Norway, Greece, Hungary and Slovenia. As part of this project, all partners will gain insights into how our European neighbours are working with online and face to face educational formats and how to use the many tools in their own lessons.

By participating, all participants will be part of a European know-how transfer in the field of digital teaching and learning approaches between the participating adult education centres and various educational institutions.

## FIRST MEETING IN TRANI

The first transnational project meeting held in Trani Italy between 20 and 21 December 2018.

The meeting was attended by all project partners, who had the opportunity to get to know each other, present their organizations, learn more about the city of Trani and, of course, to finalize the project's work-plan.

## KEY DATES

**2nd Transnational Project Meeting**  
Schrobenhausen, Germany  
30-31. of May, 2019.

Host Organisation:  
VHS Schrobenhausen

## STAKEHOLDERS' EVENT

The partners each have wide networks of potentially interested stakeholders, who will be specifically targeted. The aim is to establish important contacts with stakeholders and raise their interest in the project.

During April and May initial events will be held for stakeholders in every participating country to learn about and consult on the project development and to disseminate the project from the start. Project partners will involve adults, adult's education, and other relevant stakeholders in developing performance measures, assessing progress and outcomes to be outlined in the project.

Local authorities, policy makers and other relevant stakeholders will be shown the potential to exploit "digital@dult.eu" as another measure for promoting adults participation and contributing to social and economic cohesion, particularly through the project's territorial training events. Its dissemination and exploitation strategy will describe a clear plan on how to reach all identified target groups and stakeholders.
